

# **OO Testing in the Real World : Lessons for All**

**(Panel)**

**Dr. John D. McGregor: Clemson University (moderator)**

**Panelists:**

**Ed Berard: Chief Technical officer at The Object Agency, Inc.**

**Don Firesmith: Knowledge Systems Corporation**

**Brian Marick: Clemson University**

**Dave Thomson: Object Technology International, Inc.**

A panel of academic and industrialists specialising in OO testing will discuss methods of approach for testing large systems, whether OO systems are fundamentally different to test from the procedural systems, and whether the culture of separation of designers, developers and testers should be altered. Also to be discussed will be testing research and its usefulness and relationship in the real world environment.
